

Smart And Speedy

Proudly billed as their fastest and best looking scanners to date, Visioneer have released two new units onto the market under the banner of the OneTouch 9000 range. Offering USB 2.0 connectivity, the units are 33% smaller than other scanners in the Visioneer family, and come with a metallic-look silver finish. Furthermore, they support USB 1.1 and USB 2.0, resolutions of up to 1200x4800 dpi and 48-bit true colour. Five

OneTouch buttons are also mounted on the front of the scanner for easy access to the machine's key features. The 9020 has all of that, as well as a built in backlight and film holder for scanning 35mm slides and negatives.

The OneTouch 9000 will retail for £99, whilst the 9020 will cost £30 more at £129. Both are available around about now, and more details can be found at <http://www.visioneer-europe.com>
