

# Vioneer Scanners

## for Mobile Professionals

### Your Solution for a Paperless Road

The Vioneer mobile scanner range offers compact scanning for everyone, from the home and small office to corporate and legal workgroups. They fit neatly on a desk and can also be packed away in your laptop bag for when you are on the move. They can be powered via the USB port\*, so now you can scan, file and store all of your documents, business cards and photos wherever you are.

#### Scan Anything Anywhere

The Vioneer mobile scanners are multi-tasking machines that fit easily on your desktop and with their patented AutoLaunch Technology all you need to do is insert a document to automatically start scanning. The powerful paper management software bundle lets you organise your scanned documents into text searchable PDF files and store them in the same folders as your PC-created files from Microsoft Office, Adobe Acrobat and numerous other applications.

#### Scan to Text-Searchable PDF

Transform volumes of paper, photos and existing electronic files into organised digital files that you can quickly find, use, share and store. In PDF format, you can instantly search documents for keywords or phrases. This gives them additional archival benefits beyond traditional storage, and the widely accepted PDF format lets everyone view and print documents on any computer. The result is the ideal solution for streamlining information and making it easy to find.

#### Vioneer OneTouch

Vioneer OneTouch is an easy to use utility that connects the buttons on the scanner with a powerful set of scanner settings to greatly improve the efficiency of your workflow – so in just one touch the document is scanned automatically to email, Word, your printer, or simply a file folder. In addition to scanning directly to all popular destinations, Vioneer OneTouch also links the scanner with industry-leading document management software such as Microsoft SharePoint, Invu, DocuWare & Xerox DocuShare – forming an easy to use workflow from paper to a selected destination.

#### Perfect Scans from Imperfect Originals

The Strobe XP 220 and RoadWarrior both integrate Kofax VRS technology into the OneTouch scanning process. VRS is the gold-standard in image improvement technology. Imperfect originals are automatically turned into perfect scans that are easier to read, OCR results are dramatically improved, file size is decreased and scans look as clear as the originals. Every page is custom corrected automatically so you can batch together clean laser documents with your imperfect originals. The results are amazing!

#### Nuance PaperPort & OmniPage Pro

Millions of professionals rely on PaperPort to save time and money by transforming paper documents into searchable digital documents. PaperPort combines the efficiency of document management, the convenience of superbly scanned document and the power of creating PDF files, to bring a new level of operational proficiency to your organisation. OmniPage Pro provides a precise OCR & layout retention solution, quickly turning scanned documents into editable formatted text. The text can then be used in virtually any word processing, desktop publishing or web publishing program.

- Patented AutoLaunch Technology
- Scans to Searchable PDF
- Near Perfect Scans with Kofax VRS\*\*
- Scan direct to industry-leading document management software
- Lightweight & Portable
